

Wetrok Plexistar Pro

Clean acrylic glass without cracks and scratches

Acrylic glass panes are more popular than ever. In the form of protective screens or partitions, they protect employees and customers from droplet transmission at counters or in offices. But cleaning acrylic glass panes is tricky, and conventional glass cleaners are not suitable. Wetrok has therefore developed a special spray for acrylic glass panes: Wetrok Plexistar Pro.

Acrylic glass pane treated with conventional glass cleaner or alcohol-based cleaner
Stress cracks develop, which reduce the lifetime of the pane.

Acrylic glass pane treated with Plexistar Pro
The pane remains in optimal condition.

Advantages

No cracks, no scratches

Imperfections, such as stress cracks and scratches in acrylic glass, make the panes look shabby and also shorten the life of the material. This often means that the pane has to be replaced after only a few months. That's why we recommend Plexistar Pro, the specialist cleaner for acrylic glass, instead of conventional, unsuitable glass cleaners.

Effective against dirt

Acrylic glass surfaces attract dust, hand prints and greasy stains like nobody's business. With Plexistar Pro you can remove all stains completely and reliably. Thanks to the gentle formula, you can even clean panes several times a day if necessary.

Crystal clear panes

Streaks and smudges? Not with Plexi-star Pro! The gentle cleaning solution contains deionised water, which guarantees that panes dry completely streak-free. For a clear view at all times and barrier-free communication with your customers

Quick and simple

In these times of coronavirus, cleaning needs to be quick and easy. Equipped only with a bottle of Plexistar Pro and a cloth, staff working in offices, at counters or on reception can clean their workplaces easily and often, including the protective screens.

Wetrok Plexistar Pro

Surface cleaner for acrylic glass

Package

12 x 0.5 litres
Art. No. 10041

10 litres
Art. No. 10040

Properties

- Ready for use (spray)
- Gentle on materials
- pH-neutral
- Lightly scented
- Streak-free results
- Specially developed for cleaning acrylic glass

pH value

6.5–7.5

Areas of application

Washable surfaces (partitions and panes made from acrylic glass, plastics, glass, tiles and flat screens).

Application: wipe with a damp cloth

Spray cleaning solution onto a folded, dry cleaning cloth. Wipe the surface completely and evenly.

Did you know that...

...microfibre cloths are **NOT** suitable for cleaning acrylic glass?

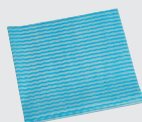

The fibres can cause fine scratches that impede visibility. This is why Wetrok recommends the use of smooth fleece cloths.

Disposable cloths for areas with increased hygiene requirements (e.g. hospitals)

Quick&Clean Dry
Art. No. 82440

Bonlin blue
Art. No. 82208

Reusable cloths for all other areas (e.g. office facilities)

Wiwit blue
Art. No. 82217

Nawit blue
Art. No. 82196

Swiss customers can now order their cloths conveniently from the online shop:
